CAREER OBJECTIVE

Professional and highly competitive Full Stack Developer with expertise in both backend and frontend development, along with extensive experience in building scalable web applications. Currently contributing as a Junior Web Developer at BrahmaByte, eager to advance my career by leveraging strong technical and problem-solving skills.

TECHNICAL SKILLS

Languages:	JavaScript, Java, Python
Frontend Frameworks/libraries:	React, Tailwind CSS, ejs, Electron
backend Frameworks:	Node.js, GraphQL, Socket.IO, Redis, Django
Database Management:	TypeORM, Prisma, MySQL, PostgreSQL, MongoDB
Tools/Technologies:	Ffmpeg, ChargeBee, Web Scraping

EXPERIENCE

BrahmaByte Lab	Itahari, Sunsari
Full Stack Developer	2024/09-now
• Developed a team monitoring system using Node.js, React, Electron, and Socket.io. • Developing a lead extraction and management along side social media integration using Web scrapping and social media integration.	
Information Care	Baneshwor, Kathmandu
Full Stack Developer Intern	2024/05 - 2024/08
• Worked as a Full Stack Developer Intern, building and maintaining scalable web applications using Node.js, React, and PostgreSQL	
International Computer Center	Itahari, Tarahara
HardWare Technician	2021/02 - 2021/09
• Provided hardware maintenance, troubleshooting, and repairs for computer systems, ensuring optimal performance and client satisfaction.	

PROJECTS

Lead Management and Social Media Integration

- Designed and implemented a web scraping system using Puppeteer and Selenium to extract leads efficiently.
- Integrated social media platforms to enable seamless communication with leads from the system.
- Enhanced lead management workflow to improve user engagement and tracking.

Device Monitoring:

- Developed a smart solution for companies to monitor employee devices efficiently.
- Implemented real-time monitoring and secure communication systems.

Note Flow:

- Built a full-stack social media app using React, Node.js, and TypeScript.
- Features responsive design (Tailwind CSS) and real-time messaging (Socket.IO).
- Managed data storage using PostgreSQL.

[github-frontend](#)

[github-backend](#)

Food Delivery App:

- created a dynamic online food ordering platform using the MERN stack.
- Implemented secure authentication, authorization, and admin panel functionalities.
- Enabled full CRUD operations with a dynamic user dashboard.
